FOR IMMEDIATE RELEASE

Local Transportation Engineering Firm Ranks 18th in the Nation

Judges for the annual CE News magazine Best Civil Engineering Firms To Work For competition ranked Traffic Planning and Design, Inc., (TPD) as the No. 18 firm on its prestigious list of the top 50 best firms to work for in the United States.

All of the firms that participated in the contest completed an extensive questionnaire about workplace practices and allowed CE News to conduct an anonymous Employee Satisfaction Survey of their staff. This new survey ensured that the employees' opinions — an inherently important aspect to this type of ranking — were considered strongly in assessing the many fine firms in the competition.

Shanon Fauerbach, P.E., Editorial Director for CE News, which hosts the ranking program, said, "This year, 157 firms competed in the thorough evaluation and comparison of their culture, benefits, performance/recognition practices, compensation, professional development programs, recruiting and retention efforts, and more. All of these firms are committed to creating a positive work environment for their staff. The top 50 firms are reaching the goal."

TPD President, Kevin L. Johnson, P.E., stated, "TPD takes great pride in our ranking among so many excellent organizations, especially given the fact that the opinions of our staff members were included as a major portion of the competition this year. We have many talented individuals who successfully plan and design great engineering solutions, but a far greater challenge is designing an environment in which our employees can grow as professionals while balancing their personal obligations."

TPD is a 125-member civil and structural engineering firm focused on transportation engineering and related environmental and construction services. From offices in Camden, NJ and Harrisburg, Pottstown, and the Lehigh Valley, PA, TPD serves public and private clients in PA, NJ, DE, MD and VA.
