Local Transportation Engineering Firm Ranks 13th Best Place To Work In PA

The public/private partnership of Team Pennsylvania Foundation, the Pennsylvania Department of Community and Economic Development, the Pennsylvania Chamber of Business and Industry, and the Central Pennsylvania Business Journal ranked Traffic Planning and Design, Inc., (TPD) as the No. 13 firm on its prestigious list of the top 50 best places to work in Pennsylvania, in the category of mid-size firms.

This statewide competition and awards program was designed to identify, recognize and honor the best places of employment in Pennsylvania, benefiting the state's economy, its workforce and businesses. All of the firms that participated in the contest completed an extensive questionnaire about workplace practices and allowed Best Companies Group to conduct an anonymous Employee Satisfaction Survey of their staff. This survey ensured that the employees' opinions — an inherently important aspect to this type of ranking — were considered strongly in assessing the many fine firms in the competition.

TPD President, Kevin L. Johnson, P.E., stated, “TPD takes great pride in our ranking among so many excellent organizations, especially given the fact that the opinions of our staff members are included as a major portion of the competition. We have many talented individuals who successfully plan and design great engineering solutions, but a far greater challenge is designing an environment in which our employees can grow as professionals while balancing their personal obligations.”

TPD is a 115-member civil and structural engineering firm focused on transportation engineering and related environmental and construction services. From offices in Harrisburg, Pottstown, and the Lehigh Valley, PA, and Camden, NJ, TPD serves public and private clients in PA, NJ, DE, MD and VA.
