Traffic Planning and Design, Inc. Recognized for Exceptional Professional Development Program

FOR IMMEDIATE RELEASE

POTTSTOWN, PA – The Professional Engineers in Private Practice (PEPP), part of the Pennsylvania Society of Professional Engineers (PSPE), selected Traffic Planning and Design, Inc. (TPD) as this year's **Professional Development Award Winner**. The PEPP Professional Development Award is presented to employers who exhibit exceptional career development initiatives and employment practices that advance the engineering profession.

Because of TPD's support of staff obtaining Professional Engineers licenses, along with our aggressive Professional Development Program and Tuition Reimbursement Policy, PEPP recognized TPD as an exemplary organization which strives to maintain a highly trained staff of designers and planners. TPD's Professional Development Program has succeeded in building staff's technical knowledge and skills which in turn continuously improves the quality of TPD's technical product. Many staff members achieve Professional Development goals by attending workshops and training sessions where they learn to master techniques and programs that so greatly contribute to the quality and efficiency of TPD's roadway and bridge designs and transportation studies.

Since 1989, TPD has continually demonstrated a commitment to providing exceptional staff benefits, including financial support and flexible schedules for Professional Development opportunities. From the newest office in Pittsburgh, to Pottstown, Harrisburg, and the Lehigh Valley in PA, and an office in Camden, NJ, TPD's 135 members, including 34 licensed Professional Engineers, specialize in providing transportation planning, highway and traffic signal design, bridge design and inspection, environmental permitting, and construction management and inspection services to municipal, state (DOT), and private clients. Visit us on the web at www.TrafficPD.com.
