Unionville's Roundabout Wins Engineering Award

During Delaware Valley Engineers Week in February, the firm that designed the modern roundabout on Route 82 in East Marlborough Township, Traffic Planning and Design (TPD), won the Pennsylvania Society of Professional Engineers (PSPE) Southeast PA Region's Notable Engineering Achievement Award. Only the second roundabout in the state and the first on a state numbered highway, the Route 82 roundabout opened in August 2005 to rave reviews. Congratulations to TPD and East Marlborough Township upon receiving this well-deserved recognition! East Marlborough and TPD turned to a roundabout solution when it became apparent that a signalized intersection would require too much right-of-way and still not solve the long-term congestion issues at this busy three-legged intersection.
